

Measuring *Semi-Auto*

SEMI-AUTOMATED Stop/Pusher System

Programmable length stop or material pusher

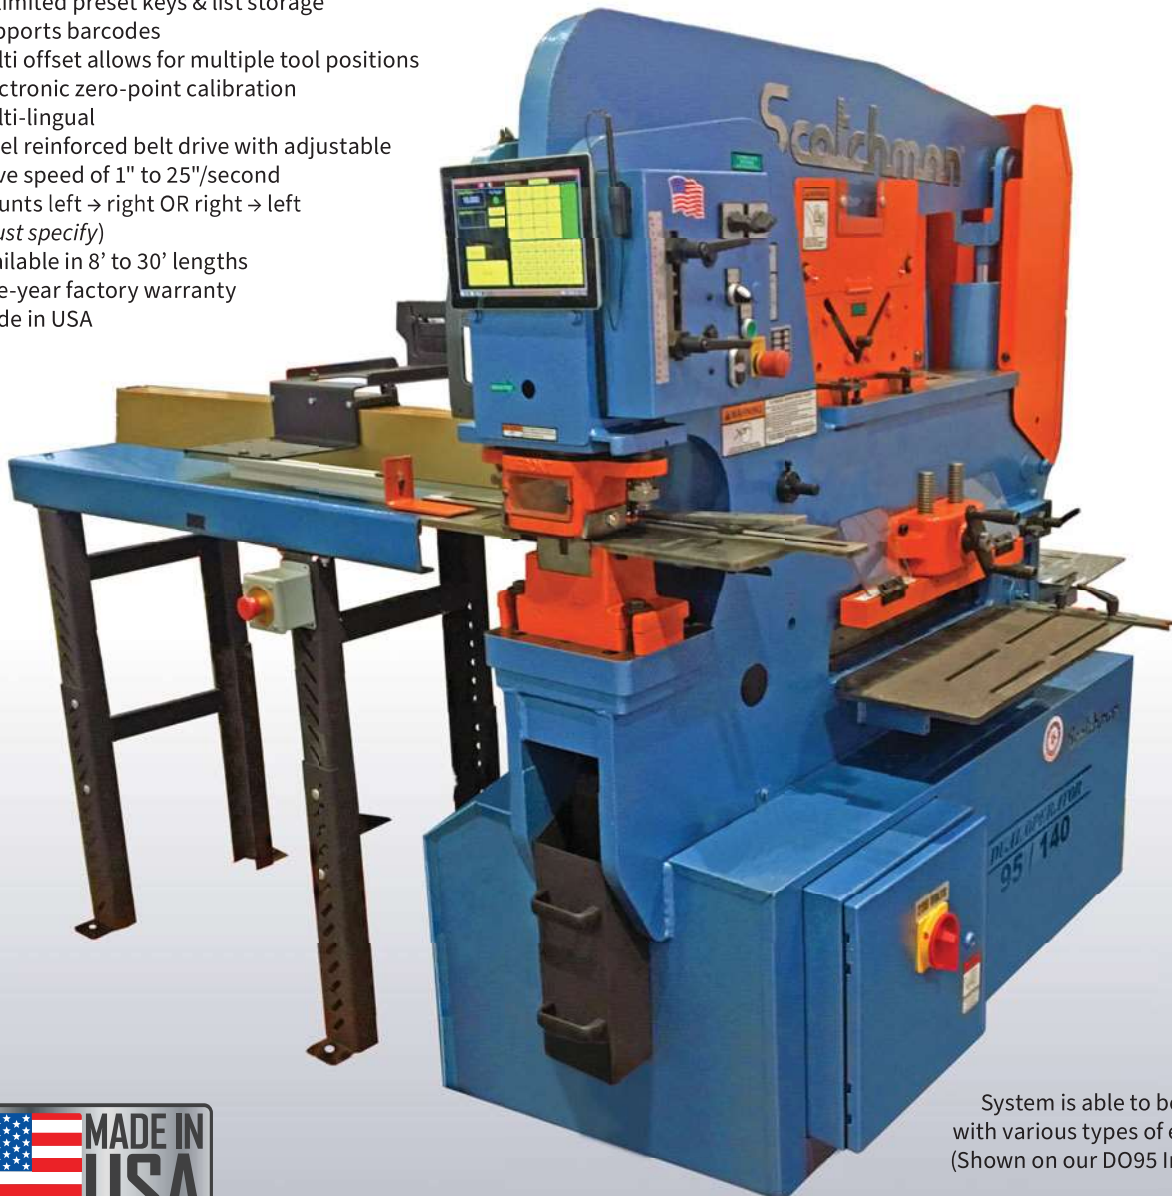

This programmable measuring system eliminates operator error and is easily programmed to measure length or has the ability to push material to a desired length. Simply enter a part length and the stop will advance to that position quickly and accurately. This Stop/Pusher System can move one length at a time or be programmed with a series of lengths and quantities for faster operation.

FEATURES

- Positioner accuracy ± 0.008 "
- 17" Screen – Windows® touchscreen technology
- Works in inches, fractions, decimals, or metric
- Fraction keys work as the "go" key
- Unlimited preset keys & list storage
- Supports barcodes
- Multi offset allows for multiple tool positions
- Electronic zero-point calibration
- Multi-lingual
- Steel reinforced belt drive with adjustable drive speed of 1" to 25"/second
- Mounts left → right OR right → left (*must specify*)
- Available in 8' to 30' lengths
- One-year factory warranty
- Made in USA

STOP/PUSHER FUNCTIONS

- Auto Pusher Mode
- Batch Mode
- Incremental Mode
- Set Point Mode

System is able to be paired with various types of equipment (Shown on our DO95 Ironworker)
